I looked at the worksheet entitled "criteria comparisons" in both file you sent me 071712 and the one I sent you 072412.

Sorry, I got my wires crossed somehow in writing the comments. I have corrected the paragraph you were asking about in the attached word document (track changes mode). I will work later this week to get this sent "officially".

Sorry about that.

Candice

Hi Candice,

In the 2nd paragraph of the comments, you refer to columns in the spread sheet, and those do not seem to be lining up for me. I think ultimately I need to be comparing columns AE and AF to each other and AG is the BLM numbers. They just don't match up to your comments (I think they are one column off), and I shared the comments and spreadsheet with Bill, Gary, and Dina, so I wanted to get it straight when they start asking me questions. We are meeting about the comments to discuss today at 1 ET. I think I have it straight now if I move over one column to the right.

Here is the latest worksheet. I have added a lot of new tabs (since sending the comments), but I think

that the first two worksheets contain info that was used in deriving the comments. Are their specific questions / differences that you want to go over?

I am still working on running additional BLM data (input data in other sheets), but will share it with you when I am done.

Candice,

Is there another updated spreadsheet that the comments refer to. I am not getting the comments to line up with the last updated spreadsheet you gave me (see attached). Thanks.

Tamara-

Here are our comments on the SSC approach.

The paper version will be put in the mail to Diana. Feel free to contact me if you would like to discuss this further.
